PLANT AND SOIL

Contents Volume 302 Nos. 1–2 January 2008

Marschner Review

Enrichment of cereal grains with zinc: Agronomic or genetic biofortification?
I. Cakmak 1–17

Regular Articles

Rhizosphere microbial community and its response to plant species and soil history
P. Garbeva, J.D. van Elsas and J.A. van Veen 19–32

Flavonoids in roots of white clover: interaction of arbuscular mycorrhizal fungi and a pathogenic fungus
S.C.K. Carlsen, A. Understrup, I.S. Fomsgaard, A.G. Mortensen and S. Ravnskov 33–43

Effects of alternate partial root-zone irrigation on soil microorganism and maize growth
J. Wang, S. Kang, F. Li, F. Zhang, Z. Li and J. Zhang 45–52

Management of soil microbial communities to enhance populations of *Fusarium graminearum*-antagonists in soil
C. Perez, R. Dill-Macky and L.L. Kinkel 53–69

Application of ^{15}N natural abundance technique for evaluating biological nitrogen fixation in oil palm ecotypes at nursery stage in pot experiments and at mature plantation sites
A.L.V. de Carvalho, B.J.R. Alves, V.L.D. Baldani and V.M. Reis 71–78

Effect of salinity on composition, viability and germination of seeds of *Chenopodium quinoa* Willd
H.-W. Koyro and S.S. Eisa 79–90

Biodiversity of diazotrophic bacteria within the soil, root and stem of field-grown maize
L.F.W. Roesch, F.A.O. Camargo, F.M. Bento and E.W. Triplett 91–104

Evaluation of the mobility and discrimination of Ca, Sr and Ba in forest ecosystems: consequence on the use of alkaline-earth element ratios as tracers of Ca
T. Drouet and J. Herbauts 105–124

Analysis of field-moist Cd contaminated paddy soils during rice grain fill allows reliable prediction of grain Cd levels
R.W. Simmons, A.D. Noble, P. Pongsakul, O. Sukreeyapongse and N. Chinabut 125–137

R.W. Simmons, A.D. Noble, P. Pongsakul, O. Sukreeyapongse and N. Chinabut 125–137

Effects of common soil anions and pH on the uptake and accumulation of perchlorate in lettuce
A.L. Seyfferth, M.K. Henderson and D.R. Parker 139–148

Physiological and genetic analysis of root responsiveness to auxin-producing plant growth-promoting bacteria in common bean (*Phaseolus vulgaris* L.)
R. Remans, S. Beebe, M. Blair, G. Manrique, E. Tovar, I. Rao, A. Croonenborghs, R. Torres-Gutierrez, M. El-Howeity, J. Michiels and J. Vanderleyden 149–161

An X-ray absorption spectroscopy investigation of speciation and biotransformation of copper in *Elsholtzia splendens*
J. Shi, B. Wu, X. Yuan, C. YY, X. Chen, Y. Chen and T. Hu 163–174

Role of aluminum-binding ligands in aluminum resistance of *Eucalyptus camaldulensis* and *Melaleuca cajuputi*
K. Tahara, M. Norisada, T. Yamanoshita and K. Kojima 175–187

Representative estimates of soil and ecosystem respiration in an old beech forest
A. Knohl, A.R.B. Søe, W.L. Kutsch, M. Göckede and N. Buchmann 189–202

Cross-pathogenicity of *Rhizoctonia solani* strains on pasture legumes in pasture-crop rotations
M.P. You, B. Lancaster, K. Sivasithamparam and M.J. Barbetti 203–211

Clay minerals as a soil potassium reservoir: observation and quantification through X-ray diffraction
P. Barré, C. Montagnier, C. Chenu, L. Abbadie and B. Velde 213–220

Characteristics of amino acid uptake in barley
S. Jämtgård, T. Näsholm and K. Huss-Danell 221–231

Rhizosphere microbial community and hexachlorocyclohexane degradative potential in contrasting plant species
P.S. Kidd, A. Prieto-Fernández, C. Monterroso and M.J. Acea 233–247

***Azospirillum amazonense* inoculation: effects on growth, yield and N_2 fixation of rice (*Oryza sativa* L.)**
E.P. Rodrigues, L.S. Rodrigues, A.L.M. de Oliveira, V.L.D. Baldani, K.R.d.S. Teixeira, S. Urquiaga and V.M. Reis 249–261

Increased soil moisture content increases plant N uptake and the abundance of ^{15}N in plant biomass
F.A. Dijkstra and W. Cheng 263–271

Does the sequence of plant dominants affect mycorrhiza development in simulated succession on spoil banks?
D. Püschel, J. Rydlová and M. Vosátka 273–282

Mg and K effects on cation uptake and dry matter accumulation in tall fescue (*Festuca arundinacea*)
G.E. Shewmaker, D.A. Johnson and H.F. Mayland **283–295**

Field measurement of lupin belowground nitrogen accumulation and recovery in the subsequent cereal-soil system in a semi-arid Mediterranean-type climate
A.M. McNeill and I.R.P. Fillery **297–316**

Near infrared reflectance spectroscopy compared with soil clay and organic matter content for estimating within-field variation in N uptake in cereals
J. Wetterlind, B. Stenberg and A. Jonsson **317–327**
